## CAREER OBJECTIVE

---

To design and develop scalable, sustainable software solutions aligned with organizational goals. To analyze business requirements and translate them into efficient, reliable, and high-performance systems.

## EXPERIENCE

---

### Technical Support Intern at KOTTRAVAI ENTERPRISES PRIVATE LIMITED

Jul — Aug  
Tenkasi

Designed and developed a complete responsive website, handling frontend structure, backend integration, and deployment support. Provided technical assistance, troubleshooting, and maintenance to ensure smooth website functionality and user experience.

### Software Development Intern at ANCIT CONSULTING

Aug — Sep  
Dindigul

Designed and developed a student attendance management system using PHP, MySQL, HTML, and CSS, focusing on data accuracy, system usability, and operational efficiency.

### Python Development Intern – Cognifyz Technologies (Remote)

Sep — Oct '25

Cognifyz

Worked on Python-based development tasks, demonstrating strong problem-solving skills, effective communication, and attention to detail, with a proactive approach to learning and handling new challenges.

## PROJECTS

---

### Career Drift Detection System

Present

- Developed a full-stack AI-powered Career Drift Detection system using Python, React, and SQLite, implementing FastAPI-based RESTful architecture, JWT authentication, and SQLAlchemy ORM for efficient data management. Integrated a Scikit-learn (Joblib) machine learning engine to analyze user activity patterns and generate real-time drift scores, enabling intelligent learning path alignment through a modular and scalable system design.

### AI-Powered ChatBot with Authentication and Streaming

- Developed a full-stack AI chatbot application using Python, React, and SQLite, implementing JWT-based authentication, RESTful API architecture, SQLAlchemy ORM for database management, and Groq API integration for real-time AI response streaming with secure backend logic and modular project structure.

### Task Management System

- Developed a full-stack productivity management system using Django, implementing secure user authentication and complete CRUD operations for Tasks, Routines, and Notes. Designed a dynamic dashboard with real-time analytics (Total, Completed, Pending) and status-based task categorization. Integrated backend database management with responsive frontend UI using Bootstrap and Django templates.

### Student Attendance Tracker

- Developed a web-based attendance management system using PHP, MySQL, HTML, CSS, and JavaScript, featuring admin and user modules, a structured MySQL database schema, and secure session-based authentication.

## EDUCATION

---

**B.E Computer Science and Engineering (Final Year)**, University College of Engineering, Dindigul | CGPA: 8.1  
& Honors (2022-2026)

Present

**HSC**, Grama Committee Higher Secondary School (GPA: 85.8)

Tenkasi

**SSLC**, Grama Committee Higher Secondary School (GPA: 78)

Tenkasi

## TECHNICAL SKILLS

---

- Programming Languages: Python, Java
- Web Development: HTML, CSS, React, Tailwind, JavaScript, Django, MySQL, PostgreSQL, REST API, ORM, Python Libraries
- Tools: Git, Github, Canva,

## CERTIFICATIONS

---

Technical supportive Intern - At Kottiravai Enterprises Pvt.Ltd

HTML Certificate-Great Learning

Python Basic to Advanced -Udemy

Deloitte-Technology Job Simulation

MYSQL & Database Management -Udemy

## SOFT SKILLS

---

- Problem Solving
- Time Management
- Adaptability and Attention
